PROJECTS

Torvana – Tour Guide Platform | University Group Project

- Collaborated in a team to design and develop a full-stack travel and tour guide platform that connects tourists with local guides and tourism services.
- Implemented responsive user interfaces, RESTful APIs, and database operations to support user management, bookings, and travel-related content.
- Participated in version control, feature integration, and testing to ensure a seamless user experience and system reliability.

Tech Stack: MongoDB, Express.js, React.js, Node.js, GitHub

Mobile Application UI/UX Design | Solo Project

- Designed user-centered mobile application interfaces by applying UI/UX principles, wireframing, prototyping, and usability-focused design practices.
- Created interactive prototypes and visual design assets to improve user engagement, accessibility, and navigation flow.
- Conducted iterative design improvements based on user experience considerations and modern mobile design standards.

Tools: Figma, Canva

Japanese Food Restaurant Mobile Application | Solo Project

- Developed a mobile restaurant application enabling users to browse menus, view food items, and interact with restaurant services through an intuitive interface.
- Integrated Firebase for backend services, including data management and real-time application functionality.
- Designed and implemented responsive Android screens following modern mobile development and UI design practices.

Tech Stack: Kotlin, Android Studio, Firebase

GitHub Profile Analyzer | Solo Project

- Developed a web-based analytics dashboard that retrieves and visualizes GitHub user data through API integration.
- Implemented interactive charts and data visualizations to present repository statistics, contribution activity, and user insights.
- Built a responsive and type-safe frontend application using modern React development practices and reusable components.

Technologies: React, TypeScript, Vite, GitHub API
